EGGE MACHINE COMPANY

The First Ninety Five Years

1915

Founded by Edward N. Egge (known as E.N. by his friends) in Plainview, Texas selling, servicing and repairing Mason racing cars. The small automotive machine shop did more than just replace engine parts on vehicles of the day. Due to a limited availability and no automotive aftermarket, replacement parts — especially pistons — were constantly in short supply and difficult to get. Egge solved both problems by making his own aluminum pistons using the sand-cast process. This commitment to his customers' needs enabled him to meet the demand and keep his business growing.

We Can Do It!

1940's

In the 1940's E.N.'s son, Nels began designing building and utilizing steel molds in conjunction with sand casting pistons the company had employed years earlier.

"During WWII aluminum was scarce and Egge couldn't make pistons. Dad supported the war effort by making brass and steel fittings for the military. Perhaps the biggest step in growing the business in the late 1940's was when Dad learned to make piston molds using hot-rolled steel". Remembers Bob Egge (son of Nels). "We began the transition from sand casting to permanent mold casting, which was a huge step for Egge."

The steel molds boosted the quality and throughput of manufacturing as well as increasing the vehicle models and years.

1950's

The post-war era saw another area of growth with providing parts for Indian and Harley Davidson motorcycles. Basically, if your vehicle had a combustion engine, Egge had the parts to keep it running. "Hot Rodding" also became popular at this time and Egge was a quiet resource for speed shops of the era.

1970's

In 1972 Nels' son Bob Egge moved the company to its present location in Santa Fe Springs, CA where they have several buildings totaling 50,000 square feet of manufacturing, warehousing, distribution, sales, office and showroom space. Further enhancement to the manufacturing process came in the form of hydraulic molding equipment. Again, expanding the range of coverage to include '60's and '70's model years and expanding the throughput of product.

2010

The company has grown to include many services, such as, pump remanufacturing and babbitting of block and rod bearings.

Today, Egge Machine Company continues to focus on supplying a passionate automotive aftermarket with hard-to-find and obsolete engine parts. Egge has grown to include several "cells" of CNC and VMC milling machines. Our manufacturing facility is recognized as the last remaining cast piston manufacturer in the United States. We take pride in this fact that the core of a nostalgic hot rod or custom can have genuine American Made parts.

EGGE MACHINE AND SPEED SHOP

Parts and Services for Nostalgic Engines

EGGE MACHINE AND SPEED SHOP

EGGE MACHINE CO.

Egge Machine and Speed Shop

proudly celebrates more than 95 years of service to the antique, collector car, hotrod, and muscle car enthusiast. Egge began in 1915 as a race and general automotive repair shop in Plainview, Texas. 95 years and three generations later, we continue to provide hard to find and nostalgic performance engine parts that keep America's dream cars alive and running well. We've added nostalgic performance products from Scat, Offenhauser, Powermaster, Torco, Camcraft, Fenton, Iskenderian, Moon, and Best Gasket. Egge has everything you'll need to rebuild Y-Block Ford, Nail-Head-Buick, 348, 409 Chevy and early Hemi engines from early 1900s to 1980s.

DID YOU KNOW?...

Egge pistons are precision made with American Pride in Santa Fe Springs, CA and don't require coating to make up for engineering flaws!

Egge Order Desk

Our sales team is available to assist you Monday thru Thursday from 7:00am to 4:30pm, Fridays 7:00am to 3:30pm, Pacific Time.

Call 866.996.EGGE

to speak with your Engine Parts Specialists who can assist you with quality engine parts, technical assistance, and courteous service.

Egge by Mail

Ordering by mail is made easy by using the Order Form located in the back of the catalog. Once completed, contact an Engine Parts Specialist to establish freight charges (unless using credit card), include your payment and mail it to:

Egge Machine Company
11707 Slauson Avenue
Santa Fe Springs, CA 90670-2217

Egge by FAX

Fax the Order Form located in the back of this catalog including a phone number so we can reach you with any questions, to 562.693.1635.

Payment Methods

Egge Machine Company accepts credit cards (Visa, Master Card, American Express, Discover, JCB), checks, money orders, and wire transfer (wire transfers are subject to a \$15.00 service charge).

First Time Buyer - Credit card or COD-Cash ONLY. COD orders incur a \$10.00 charge per package.

Returned Checks will incur a \$30.00 charge.

Distributors

Please contact an Egge Engine Parts Specialist for qualifications.

Shipping

Domestic Orders (less than 150 lbs) ship via UPS Standard unless otherwise requested. Next-day, two-day and three-day delivery is available upon request.

International Orders ship via UPS Express or USPS Global Express unless otherwise requested. All shipments are FOB Santa Fe Springs, California.

Shipping and handling charges will be added to your purchase. COD orders incur an \$10.00 charge per package.

Core Charges

Camshafts, rocker assemblies, some main bearing shells, oil, water and fuel pumps, and connecting rods are exchange items. Core charges applied to these parts are deemed appropriate to the value of the core. All core charges are refundable upon receipt of an exchange core suitable for rebuilding.

Return Policy

Please open and inspect your shipment immediately upon receiving it from EGGE. If you are not completely satisfied with a product purchased from EGGE, you may return it for exchange or balance on account. Note our Electrical Parts Return Policy on page 48.

**Please call us
prior to returning all parts!**

Your EGGE sales rep will issue an identifying RGA# (return goods authorization). Please pack your return parts well and insure the contents. Returns must pass a quality inspection and be in a re-sellable condition. Refunds for C.O.D. orders require 30 days, from date the returned parts are received, to process.

WARRANTIES

GENERAL WARRANTY

Products purchased from Egge Machine Company and not manufactured or remanufactured by Egge Machine Company are covered by the original manufacture's established warranty and subject to manufacture's conditions and policies. Products manufactured and/or remanufactured by Egge Machine Company are warranted for twelve months from original purchase date. Warranty limited to replacement of defective part or parts. Please note the Return Policy on Page 1.

REMANUFACTURED OIL PUMP WARRANTY

ALL pumps are guaranteed against defective materials or workmanship. Our liability is limited to: the replacement of pump only, and no other incidental or consequential expenses. Any pump returned for warranty must be returned without dismantling to qualify for replacement.

EGGE PISTON WARRANTY

Egge Machine Company warrants each Egge manufactured piston and piston pin assembly to be free from defects in materials or workmanship for a period of 90 days from date of installation. Any Egge piston or piston and piston pin assembly which, under normal and proper use, is proved to be defective either in materials or workmanship will be replaced. Any product claimed to be defective shall, at the option of Egge Machine Company, be returned prepaid to Egge Machine Company.

THE PROVISIONS OF THIS WARRANTY CONSTITUTE THE ONLY AGREEMENT OR OBLIGATION OF EGGE MACHINE COMPANY. CONCERNING THE SUBJECT OF WARRANTIES, ALL OTHER WARRANTIES, EXPRESS OR IMPLIED INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED.

The remedy of replacement provided by this warranty is the only remedy afforded for breach of this written warranty or for breach of any express or implied warranties arising under state law. Egge Machine Company shall not be liable for any labor costs or other expenses in replacing a defective product, nor for any incidental or consequential damages resulting from or contributed to by any defect in materials or workmanship, negligence in manufacture or design, or failure to warn. Egge Machine Company makes no warranty with respect to any product which has been altered or subjected to misuse, abuse or use for which it was not designed.

POPULAR EVENTS

SEMA Show:

The SEMA Show is the premier automotive specialty products trade event in the world (PLEASE NOTE: THE SEMA SHOW IS NOT OPEN TO THE GENERAL PUBLIC). It draws the industry's brightest minds and hottest products to one place, the Las Vegas Convention Center. As part of the AAIW, the SEMA Show attracts more than 100,000 industry leaders from over 100 countries for unlimited profit opportunities in the automotive, truck and SUV, and RV markets. SEMA Show 2008 drew over 50,000 domestic and international buyers through two million square feet of exhibits. The displays are segmented into 12 sections, and a New Products Showcase featured nearly 2,000 newly introduced parts, tools and components. In addition, the SEMA Show provides attendees with educational seminars, product demonstrations, special events, networking opportunities and more... www.SEMAShow.com

PRI (Performance Racing Industry)

Taking up 1,000,000 square feet, 1200+ companies will display the latest advances in racing products and race engineering. Engine parts, suspension components, data acquisition, safety gear, new metal alloys and coatings, machining equipment, race electronics...it's all part of the world's largest racing trade show.

Arriving from 60+ countries, 40,000 buyers will scour the displays to source the new technology that will be winning races next year. It's all hardcore racing. No fuzzy dice. No neon windshield wipers. The PRI Trade Show is so big, they can't afford to miss a single day.

Attendees are pre-qualified. Admission is complimentary, but they must all prove they own, manage or are employed by a racing business. Buyers for tens of thousands

of racing retail stores, warehouse distribution centers, professional race engine builders, race car production companies, are making 2010 inventory decisions in each exhibit. They represent the all-important distribution pipeline for racing products. In the US alone, there are more than 400,000 racers, the vast majority of whom are at the grassroots level, purchasing products from their local race store or race engine builder. Thousands of professional race teams, from NASCAR Cup teams to NHRA Top Fuel, ALMS to Grand Am, Japan to the UK, send buyers to ensure they are current with today's race technology. www.PerformanceRacing.com

The Grand National Roadster Show

The GNRS is now in its 60th year. Once known as the Oakland Roadster Show, it is the longest running indoor car show in the world! Produced at the Fairplex in Pomona for the 6th consecutive year.

Over 500 show vehicles will compete for awards inside all of the Fairplex buildings. Another 400-800

vehicles will join the event Saturday & Sunday for the GNRS Drive In parked in between the buildings and walkways. www.RodShows.com/GNRS

Sacramento Autorama

The Sacramento Autorama has been in Sacramento for 59 years and is the 2nd longest running indoor car show in the World. The Autorama is recognized as the premiere custom car show on the West Coast. The Show will feature over 450 of the finest custom cars, hot rods, classics, motorcycles, and specialty vehicles from around the county. www.RodShows.com/SA

Hot Rod and Restoration Show

The Hotrod & Restoration Trade Show is the only show of its kind serving the business - to - business side of the market. The show is produced exclusively for the hot rod, street rod, muscle car, and restoration markets. As this market

continues to grow and the type of vehicles within this category continues to diversify, the Hotrod & Restoration Trade Show serves as the focal point for new product introductions, emerging trends and the most important gathering of the year for industry movers and shakers. www.HotRodShow.com

Good-Guys Association

The Goodguys Rod & Custom Association promotes and produces some of the world's most dynamic automotive events. Why? Because we're car people, just like you. Founded by lifelong hot rodder Gary Meadors in 1983, Goodguys events feature thousands of candy colored hot rods and custom cars sprawled throughout venues such as lush fairgrounds, super speedways and large outdoor stadiums. The cars, the vendor exhibits, the live entertainment and colorful people create a festive atmosphere charged with electricity. Goodguys offers over 20 events annually across the country from the West Coast to the East Coast and all points in between. The events range from two-day affairs attended by 30,000 to 40,000 people to three and four day extravaganzas attracting over 100,000 auto enthusiasts. www.Good-Guys.com

National Street Rod Association

The National Street Rod Association's great slogan is "Fun With Cars." And it's really that simple.

We are heavily involved in the specialty automotive vehicle participant sport, from the people that enjoy participating with their vehicles to the industry that has evolved from within. NSRA is the organizing body that made the sport what it is today, and it is the reason the growth of enthusiast participation has continued at a steady pace since the association was founded in 1970. NSRA provides leadership, guidance, and fun events for enthusiasts who favor driving their specialty vehicles wherever and whenever they want to. www.nsra-usa.com

EGGE MACHINE AND SPEED SHOP

EGGE SHOP TOUR

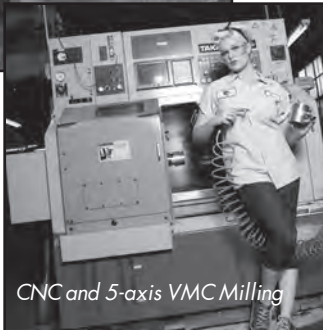

Egge Machine Company assists their customers in transforming their dream cars or their customers' cars into drivable realities by providing the nostalgic automotive enthusiast with quality vintage engines parts, internal engine components, and nostalgic performance products at competitive prices. Egge proudly celebrates 95 years of dedicated service to the antique, collector car, hot rod, and muscle car enthusiasts.

Egge Machine Company is a world-class piston and valve manufacturer that specializes in domestic vehicle applications from the early 1900s to 1980. Egge operates a state of the art foundry and machine shop at its Santa Fe Springs, CA facility. We use high silicon A-332 aluminum-alloy, which is ideal for automotive piston applications. Our pistons are cast using original permanent steel molds. Egge has a wide-range of original molds, which allows us to manufacture pistons to fit most automotive, light truck, AG/industrial, and marine applications. And, unlike other manufacturers, Egge's precision pistons are made in the USA and don't require coating to make up for engineering flaws!

We invite you to come to our showroom and with an appointment, take a tour of the facility in Santa Fe Springs, CA.

ZINC AND MOTOR OIL

By now you have probably heard about or read the numerous articles in Hot Rod, Car Craft, Rod & Custom, or Motor Trend, about the increase in cam and engine failures and the relationship to the government changes to the API ratings of motor oil.

Zinc additives have been used in motor oil since the late 1940's, about this time the API category containing zinc was rated MS for "Most Severe". Somewhere in the early 1960's the API categories changed to "S" ratings and have progressed from SA to the current SJ, SL and SM ratings. Zinc additives peaked with levels of 1200ppm, content % mass in the 1980's.

The current API automotive gasoline engine service ratings are as follows:

SG - 1989 Zinc content peaks at 1200ppm (obsolete)

SJ - 1997 First reduction of zinc for certain viscosity grades that would provide fuel savings credits to manufacturers. Reduced to 1000ppm max. (not all grades)

SL - 2001 Catalyst compatible Zinc/Phosphorus content % mass. 1000ppm max. (This is a 17% reduction in Zinc mandated by API)

SM - 2005 Catalyst compatible Zinc/Phosphorus content % mass. 800ppm max. (additional 20% reduction of Zinc, overall 33% reduction from SJ rating!)

The common name used for Zinc is "Zinc Dothiosphosphate" it is an anti-wear (weld) and oxidation inhibitor chemical. Phosphorous and Zinc are couple together in almost a 1:1 ratio. The phosphorous part of the chemical is a heat-seeking element that triggers the plating out of the zinc element; this will cause a barrier to exist between two moving opposing surfaces. The new zinc reaction layer will not allow contact asperities to weld or transfer metal fragments. This reaction will always take place as long as the

proper level of zinc is present in the motor oil. The downside is that Zinc rubbing on Zinc even though it's sacrificing itself, for the sake of the metal beneath it, is very sticky and does not want to let go of itself. This characteristic actually increases friction on contact surfaces beyond what the original surface would have exhibited.

Since the late 1980's this zinc "high-friction" characteristic has been studied, and hundreds of SEA papers have been written on the subject. It has been proven that the reduction of Zinc in motor oil has increased fuel mileage. It has also proven that the reduction of Zinc increases engine wear. By reducing zinc content, phosphorus automatically is reduced in a like amount, fuel mileage goes up, engine friction goes up, and engine wear goes up! This is OK for newer engines, because the contact load demands, spring tension and compression have been reduced so much. The main reason zinc and phosphorus have been reduced is to help keep oxygen sensors and catalytic converters from premature failure. This is the reason for the API SL and SM Zinc reductions.

On the other hand older engine styles for Hot Rods, Sports Cars and any high performance engines for racing and street use are truly in jeopardy by using reduced phosphorus and zinc motor oils. Cams seem to be the weak spot: and cam lobe failure solutions have become a major issue.

Many years ago, Torco found that by supplementing the Zinc and phosphorus with a "special oil soluble" molybdenum compound, that both friction and wear is reduced. Today this proprietary "MPZ" chemistry is used in all Torco High Performance products.

Egge offers the complete line of Torco Advanced Lubricants. You can find a listing on pages: 62-63.

HOT ROD TERMINOLOGY

Excerpts from the December 1952 issue of Popular Science

Bent Eight: Any V-8 engine. It's cylinders are arranged in two lines of four, the lines being set at an angle to each other like the sides of the letter V.

Bone: A Model A Ford.

Chopped Flywheel: An engine flywheel from which metal has been removed to reduce weight. A light flywheel has less inertia and aids in acceleration.

Flat Crank: A crankshaft on which the throws are all in the same plane on opposite sides of the centerline of the main bearings. Also known as a 180 crank. In contrast, most V-8 crankshafts are designed with the throws arranged at angles of about 90 degrees.

Four Banger: A four cylinder engine.

Fuel Block: A device with multiple outlets interposed between the fuel pump and the carburetors to insure equal fuel pressure at each carburetor.

High Head: An engine cylinder head designed to increase compression of the fuel-air charge. (High Compression Head)

High-lift Cam: A camshaft on which the lobes are designed and found to increase the valve lift and change the valve overlap.

Hot Mill: A souped-up engine.

Jiggler: One of the rocker arms that actuate the valves in an overhead valve engine.

Milled Head: Shaving the lower side of the head to increase compression.

Nested Valve Springs: Double valve springs, with the smaller one operating within the larger one, the object is to overcome valve flutter at high speeds.

Overlap: The period when the intake and exhaust valves of a cylinder are both open.

Slug: Piston

Street Job: A hot rod designed for comfort, looks and utility; not for racing.

Stroker: An engine which has been stroked to increase piston throws.

T-Bone: A Model T Ford

ASK BOB

HERE ARE SOME EXCERPTS FROM OUR POPULAR ASK BOB PART OF OUR EGGE TECH SECTION AT OUR WEBSITE. SEND YOUR QUESTIONS TO: ASKBOB@EGGE.COM

What are the holes on the piston side of the valve head for and will they destroy my valves?

Q: I just purchased 10 x Toledo S592 exhaust valves to suit a 1930 ser 40 Buick engine. I noticed the piston side of the valve head has 3 small 1/8" holes drilled in to each valve about 1/8" deep why would this has been done and would this be detrimental to the valve in use.

A: These three holes were for an old style valve lapping tool. Some of the older valves used a slot some used the holes. You would put the tool in the holes or slot and rotate to lap the valves into the head. This will not cause any problems in your engine.

Where do I find the engine serial number on my vintage engine?

This varies some, but as a general rule you'll find them on a machined surface and in a place where they are reasonably accessible and on the block itself. Places to look include on the top of the head gasket surface, on the top of the intake gasket surface, on the bottom rail (pan gasket

surface), next to the distributor, or on a special machined block. They will always be stamped in - not

cast in (those are casting numbers).

What ways are there to tell which engine I have?

Engine serial numbers will certainly do this as long as you have a way to compare them. In most cases the original manufacturer used a code in the serial number to indicate what it was. Another way is to use casting numbers. If an engine block was cast for only one size or series this can be a help. If you have detailed info, sometimes an engine can be identified by unique visual points. Finally, you can check the bore and stroke and determine the cubic inch size. When trying for a pure restoration, some or all of this things may be important. For example, an engine with the same exact cubic inch size may be used for several years and casting numbers will change to reflect when it was cast. Or, as in the early small block Chevrolets, there may be different bearing sizes, indicating a different machining process. In some cases these differences can be dramatic.

SCAT TECH – provided by SCAT

5 WAYS TO BREAK THE NOSE OF A CRANK

In recent months we have had numerous questions and issues raised about the nose of the crank and what can cause it to break.

What we have found is that in most cases the crankshaft gets the blame for such failures. But in fact, it is the parts that are being used in conjunction with the crank, it is the additional machining done to the parts that are being used with the crank, it is 99% of the time NOT the crank that caused the crank to break.

1. IMPROPER MACHINED CRANK GEARS

A. Chamfer machined at wrong angle.

B. Chamfer machined with too small an angle.

C. Belt drive gears. The seal sleeve bottoms to the face of the main before the inner face of the gear bottoms against the step in the nose of the crank. All of the above prevents the crank gear from bottoming against the step on the nose of the crank.

This leaves a gap between the gear and the step, which allows the crank to flex . . . A fatigue crack starts. SNAP!!!! The crank breaks.

2. DAMPERS WITH MOVING INERTIA WEIGHTS

A. Fluid, balls, springs, inertia rings with rubber O-Rings, etc. Can you balance a wheel on your race car if the tires are flat? How can your rotating assembly be balanced if to quote one manufacturer, "These units (Dampers) should not be on the crank for balancing as the inertia weight may not be centered until the engine starts." NEWS FLASH!!!! Centrifugal force will always take the inertia weight off center no matter what RPM. Your assembly is never balanced. TELL TALE SIGN!!!! Metal transferred on nose outside diameter and damper internal diameter. A fatigue crack starts. SNAP!!!! The crank breaks.

3. EXTERNAL BALANCE vs. RPM

A. Rotating weight multiplies as RPM increases. Engines have heavier or lighter balance weights and larger or smaller noses. RPM above 5500RPM is more risky on a Small Block Chevy than a Big Block Chevy. However, as RPM's go up, the weight more and more wants to leave the crank due to centrifugal force. Do not be surprised if at some point fatigue sets in and the nose comes off.

4. DRIVES EXTENDING BEYOND THE NORMAL DISTANCE ON THE NOSE

A. Multi-stage oil pumps, blowers, etc all have belt drives that require torque taking off at 90 degrees to center line of the crank. More torque is necessary for driving these things and further away from main bearing support all leads to multiple of leverage wiggling the nose. Fatigue sets in, nose breaks, blower stops. The Small Block Chevy has the smallest diameter nose and the weakest of all. Note: Blowers take substantially more 90 degree torque than dry sump pumps, therefore, more likely to break noses. Not recommended for Small Block Chevy. If a blower is being used, use a crank with a Big Block nose.

5. IMPROPER BALANCING TECHNIQUE

The counterweights on a crankshaft are designed to work all together as a system within a certain bob weight range. To correct the balance on a crank where the counterweights are too heavy the following should be followed:

Internal Balance:

If more than 2 holes are required in each end, the outer diameter of all the counter weights should be turned in a lathe to correct the out of balance condition in all the counterweights. If you try to drill more holes, you will create a secondary wave which will lead to crank flex and eventually a fatigue crack.

External Balance: The crank is spun with the external balance and flywheel. If it is determined that the assembly is too heavy where the weight is on the damper and flywheel, do not make the correction on the end counterweights of the crank. The out of balance condition is in the damper and flywheel, which is where it should be corrected. It is very simple to alter the bolt on weight of the damper and drill the balance weight on the flywheel. If these components need to be replaced simply bolt on the proper weight to the damper and match balance the flywheel which has to be balanced anyway. If you correct in the end counterweights, you will create a wave in the crank which will wiggle the nose of the crank which will eventually start a fatigue crack which will snap the crank.

CRANKSHAFTS

SERIES 9000 - CAST Pro Stock - REPLACEMENT

Designed to replace stock crankshafts that have seen better days - for stock or mildly built street engines.

- + Precision ground and micro polished
- + No more hassles with poor quality crank cores
- + Simplify your bearing stocks to all standard/standard size

4340 STANDARD WEIGHT - FORGED

Scats' standard weight forged crankshaft is designed for street or race engines with substantially increased horsepower

- + Straight shot & chamfered oil holes
- + Nitride hardened for superior wear resistance
- + Lightening holes in all rod throws
- + Large radius on all journals
- + Precision ground
- + Heat treated, shot peened
- + Inspected & micropolished at SCAT

CRANKSHAFTS

SERIES 9000 - CAST Pro Comp - STROKER LIGHTWEIGHT

- ✦ Aero-wing counterweights increase horsepower by reducing windage
- ✦ Straight shot oil holes
- ✦ Lightening holes in all rod throws
- ✦ Precision ground & micropolished
- ✦ Designed after SCAT's custom billets and made from their exclusive space-age 9000 material

A perfect way to increase cubic inches on mild to moderate street or race engines.

SCAT ROTATING ASSEMBLIES

All components of SCAT's ROTATING ASSEMBLIES, are designed for the ultimate in performance. Whether it is street, strip or circle track, the ultimate rotating assembly can be designed and precision balanced to meet your needs. Take the "guess work" out of purchasing a performance engine assembly.

For all kits below which include rings & bearings, note the following

Standard Rings: Premium plasma moly standard tension oil rings

File Fit Rings: Plasma ductile iron top ring, reverse twist 2nd ring & standard tension oil rings

Rings provided with kits: Std for hypereutectic piston, File Fit for Forged or SRP piston

Rod & Main Bearings: Federal Mogul or Clevite 77

ASK BOB

What is your recommendation for Cam and Heads on my hot rod 50 Merc Flathead?

I am in the process of "building up" a 1950 Merc flathead for the hot rod I am building. I would like to know your recommendation for the cam and heads to use. I was thinking of using a 3/4 race cam with Navarro heads and a Navarro three carb manifold. I am concerned (probably because I know so little about them), the proper duration and life times for the best low end performance (0 to 70mph), and smooth idle. Your thoughts?

We recommend an Isky Max 1 cam. It has good power and a good idle. We recommend the Lincoln V12 valve springs, VS487.

COMP CAMS

THUMPR™ CAMS DELIVER INCREDIBLE MUSCLE CAR SOUND AND A NEW LEVEL OF STREETABLE PERFORMANCE.

Thumpr™ Retro-Fit Hydraulic Roller and Thumpr™ Hydraulic Flat Tappet versions for carbureted Small and Big Block Chevys, various Small and Big Block Fords, Small and Big Block Chryslers, including the 392 and 426 Hemis, Oldsmobile and Pontiac engines.

Extended line of Thumpr™ series covers some of the more classic applications, such as the **Buick Nailhead**, The **Ford Flathead** and **Y-Block** and **many more**.

Thumpr™ Camshafts Feature:

- Early intake opening with long exhaust duration and a generous amount of intake and exhaust overlap to create an aggressive, hard-hitting exhaust sound that delivers a bigger thump to the exhaust note.
- Early intake closing for added torque and throttle response.
- Three unique cam designs for each application: Thumpr™, Mutha Thumpr™, and Big Mutha Thumpr™.
- Impressive gains in horsepower and a broad torque curve, making this camshaft series ideal for performance street rods and muscle cars that crave a deep, throaty idle and rev.

Egge Machine and Speed Shop has the following and many more available for you.

- AMC --- 290-401 Cu.In.
- Buick --- 364-425 NailHead
- Chevy --- Small and Big Block applications
- Chrysler --- 273-440 Cu.In. includes Hemi engines
- Ford - Flathead, Y-Block, FE, Small & Big Block
- Oldsmobile --- 260-455 Cu.In
- Pontiac --- 265-455 Cu.In. applications

PLEASE NOTE: Mechanical Flat Tappet, Hydraulic Flat Tappet and Retro-Fit Hydraulic Roller Camshafts available for many vintage performance engines

NEW!

POWERMASTER

Powermaster Motorsports is the leader in high performance OEM replacement alternators and starters for the automotive industry. Founded in 1994, Powermaster started out to show that technology could improve both the reliability and performance of automotive electrical components. Powermaster's product line consists of performance based and dyno tested alternators and starters. They also offer alternator kits that include pulleys,

belts and brackets. Many of these parts are also available separately. Research and development is conducted at their corporate headquarters in Knoxville, Tennessee. With two manufacturing locations including Knoxville, TN and West Chicago, Illinois all products are built on service and backed by an enviable reputation for quality and reliability. Powermaster has quickly become a major force in the industry. Relying on a

technological edge and strong performance background, every Powermaster starter and alternator is tested on custom built starter and alternator dynos. Their belief is to 'overbuild' every product they produce to guarantee performance, and give you peace of mind.

Powermaster gets you started and keeps you going!

EGGE SPEED SHOP

NEW!

NEW REPLACEMENT ALTERNATORS

Brand new high output alternators. Direct replacement for OE alternators. Available in Natural, Chrome and polished finishes Ford, GM and Mopar applications. Also available in Smooth Style.

NEW REPLACEMENT STARTERS

Brand new OEM replacement starters. No exchange necessary. Looks just like original OE starter. Ford, GM and Mopar applications.

NEW!

POWERGEN

The look of a generator the power of an alternator. Designed to fit original generator bracketry. 7.5 AMPS with 60 AMPS at idle. One wire hook-up.

Available for:

Ford Flathead (both early and late styles), 50s & 60s style. GM applications (both long and short styles). Universal for Mopars and other applications.

CALL FOR A COMPLETE LISTING OF APPLICATIONS FOR YOUR VEHICLE

ULTRA TORQUE HIGH SPEED STARTERS

Direct replacement for most OEM starters. Gear-Reduction delivers up to 180 ft lbs of torque. Smaller size allows more header and exhaust room. Perfect for hopped up engine applications.

Egge Electrical Parts Return Policy

Electrical parts that have been installed in the vehicle cannot be returned for credit or cash unless due product defect warranty. Electrical parts NOT installed can be exchanged and are subject to inspection before exchange can be completed.

When ordering Pertronix Ignitor Kits, please provide the following information to ensure that we will supply you with the correct application:

- Year, Make and Model
- Number of Cylinders
- Positive or Negative Ground, 6 or 12 volt.
- Single or Dual Point Distributor
- Serial Number of Distributor

Some applications may require further information or research.

BESTgasket

BESTgasket is the world's premier manufacturer of gaskets for vintage and classic American cars and trucks. Finding better solutions to old sealing problems is what Bestgasket does best... what was good enough 50 years ago, or even 5 years ago, isn't good enough for today.

PRODUCT LINE

includes gaskets for:

AMC-Nash-Rambler	Ford-Mercury
Buick	Hudson
Cadillac	Lincoln
Chevrolet-GMC	Oldsmobile
Chrysler-DeSoto	Packard
Dodge-Plymouth	Pontiac
	Studebaker
	Willys-Jeep

Gaskets for Vintage American Automobiles of the 1930s - 1960s

ABOUT BESTGASKET HEAD GASKETS

BESTgasket makes two styles of premium-quality head gaskets:

1) Copper (suffix of "C") — consists of two outer sheets of a generously thick .010" copper and a low-density graphite "filler" sheet. This high-quality graphite sheet is superior to asbestos, which was used in the old days, and far superior to the non-asbestos materials found in other manufacturers' modern copper head gaskets. Excellent torque retention is achieved by using superior materials.

Our copper gaskets are definitely "old-school," but with a modern flair for better performance. They are such works of art, we almost hate to sell them!

2) GraphTite™ (suffix of "G") — consists of Kevlar reinforced graphite facing material mechanically bonded to both sides of a perforated steel core. This modern engineered, high-performance material is rated to a temperature of 1400 degrees-F. Steel fire rings are installed in the combustion chamber areas of the gasket.

GraphTite™ head gaskets have superb sealing characteristics, excellent torque retention, and hold up to the punishment dished out by high-performance engines — high quality all the way. This gasket might be overkill for cruiser engines, but so what... extra performance never hurts!

Install GraphTite™ head gaskets using whatever sealant methods have proven to work well for you over the years. Some engine builders use a spray-on sealant like Copper Coat. Others prefer to use a thin bead of silicone sealant around each water and oil hole.

BESTgasket has developed rubber replacement seals for the following engines where only rope seals have previously been available:

Buick st-8 40-50 series, 1934-53
*Buick V8 364-401-425, 1957-66 **
Cadillac V8 331-365, 1949-58E
Chevrolet V8 265-283, 1955-58
*Chrysler V8 392, 1957-58 **
*Ford V8 312, 1956-57 **
Oldsmobile V8 301-324, 1949-56
*Oldsmobile V8 371-394, 1957-58 **
*Oldsmobile V8 394, 1959-64 **

BESTgasket Rear Main Seals available for the following models:

5342..... AMC 250, 287, 327 V-8
 6228..... Buick 215, 300, 340 V-8
 5117S .. Cadillac 346 V-8
 6100..... Chevrolet 216, 235 6 cylinder
 5263..... Desoto 276, 291, 330, 341 V-8
 4287..... Ford 239 flathead V-8
 5249A .. Ford 272, 292, 312 V-8
 5144..... GMC 228, 248, 270, 302 6 cyl.
 6215..... Lincoln 317, 341, 368, 430, 462
 5145..... Oldsmobile 303, 324 V-8
 6380S..... Pontiac 400, 428(1967) V-8
 6382S..... Pontiac 428(68-69), 455 V-8

BESTgasket Head Gaskets available for the following models:

597G..... Buick 364, 401, 425 V-8
 568G..... Cadillac 331, 365, 390 V-8
 506G..... Chevrolet 348 V-8
 585G..... Chrysler 354, 392 V-8
 628G..... Dodge 241 V-8
 572G..... Ford 272, 292, 312 V-8
 618G..... Lincoln 430, 462 V-8
 566G..... Oldsmobile 303, 324 V-8
 598G..... Studebaker 259, 289 V-8

GraphTite™ rope seals are miles ahead of any other rope seal out there. This marvelous material is easy to trim and it seals!! To ensure exact trimming, each kit includes installation instructions, a special knife, and a few other trimming aids. Our customers have reported great success with GraphTite™ rope seals, finally solving those aggravating rear main seal leaks. No hype here... just results.

Note: For a few applications NOS-asbestos ropes will be used until our remaining stock is depleted, then changed over to GraphTite™. Asbestos rope seals worked well back in their day, and they still do today.

NEW!

FINNED ALUMINUM REMOTE OIL FILTER ASSEMBLY

Finned aluminum remote oil filter with machined top and cast canister, uses spin-on filter. Bolts on to firewall, frame rail or any flat surface. Great for those times when OE filter is in the way. Filter not included.
MPF200

NEW!

MOON FINNED ALUMINUM FORD/MERCURY Y-BLOCK VALVE COVERS

1954-64 Ford or Mercury 239 cid and 312 cid Y-Blocks. Highly polished with inner fins left raw for accent and painting.
MP640

NEW!

MOON FINNED ALUMINUM HEMI VALVE COVER

1951-58 Chrysler 331 cid or 392 cid Hemi Valve Cover. Available highly polished with inner fins left raw for accent and painting.

DRESS UP ITEMS

PAT-102

CHEVROLET 235 SHORT WATER PUMP AND PULLEY

Install '55-'62 '235 engine in '54 and earlier cars and trucks without moving the radiator forward or butchering the core support or latch panel. Spacer and gasket included.

PAT-100

VELOCITY STACK

Polished Aluminum
(includes mesh screen)
2 5/8" 2BBL Neck

NEW!

POLISHED FINNED FILTER ASSEMBLIES

Compact in size, considering it's large filtration capability. We furnish a U.S. made filter - replacements available in your local market. Mounting hardware and fittings are not included.

Drilled for 5/16" mounting bolts - holes are 4-3/16" center to center.

Drilled and tapped for 3/8" line fittings. Max. width 5-1/4". Projection from mounting surface 3-3/4". Height with fuel filter 4-3/4". Height with oil filter 5-1/2".

6840 Fuel Filter
6846 Oil Filter

WAY-235

WAYNE 6 CYL. CHEVY DRESS-UP KIT

Wayne Set includes the Rocker Cover and Side Cover, Stud Kit and Breather.

NEW!

POLISHED AND FINNED VALVE COVER BREATHER

3" diameter with a 3/4" or 1" neck fits valve covers with with a 1" or 1.25" hole when using a rubber grommet.

6803 - 3/4" Neck
6801 - 1" Neck

NEW!

6821

POLISHED AND FINNED OIL FILL TUBE & BREATHER

Chromed steel filler tube with polished, finned aluminum breather. Fits 1.25" hole in various vintage style manifolds/engines. Cap diameter is 2.75" and the total assembly stands 8.5" tall.

NEW!

POLISHED AND FINNED COIL COVER

Great looking and now with a standoff mounting rib makes cleaning hassle-free. Mounted with a 1/4" x 20 drive studs that can't be mistakenly driven into the side of the coil! Also available with chrome 12v coil.

6831 - Polished Coil Cover
6833 - w/Chrome Coil

OTB GEAR

POLISHED FINNED TOP 2 BARREL AIR CLEANER

4120 - w/2" filter
4121 - w/3.25" filter

OTB Gear Air Cleaners are cast from premium aircraft grade hardened A356 alloy which when polished makes a brilliant shine. 2 barrel retro designs fits a 2" or 3.25" tall air filters. Each 2 barrel air cleaner comes with OTB Gears' cutting edge filter design. Washable neutral gray oiled fabric with stainless steel mesh. Sparkles in the sunlight and won't rust.

POLISHED DOME TOP 2 BARREL AIR CLEANER

4140 - w/2" filter
4141 - w/3.25" filter

POLISHED AERO TOP 2 BARREL AIR CLEANER

4150 - w/2" filter
4151 - w/3.25" filter

POLISHED FINNED OVAL 4 BARREL AIR CLEANER

OTB Gear Air Cleaners are cast from premium aircraft grade hardened A356 alloy which when polished makes a brilliant shine. Each air cleaner comes with a washable oiled fabric air filter.
4410 - polished oval 4 brl air cleaner

POLISHED FINNED FUEL LOGS

Available in 2, 3 or 4 port versions. Use all ports to feed carburetors, or dedicate one for a fuel pressure gauge. Cast in quality aluminum alloy, drilled and tapped for 1/4" fuel line fittings.
6132 - 3.5" long 2 port
6134 - 5" long 3 port
6136 - 6.5" long 4 port

POLISHED FINNED FUEL BLOCK

This old-school design has been refined to a better product, visually and mechanically. Features 3 ports to feed carburetors, or dedicate one for a fuel pressure gauge. Cast in quality aluminum alloy, drilled and tapped for 1/4" fuel line fittings. Mounts to any flat surface.
6130 - 3 port polished fuel block

POLISHED RETRO FLATHEAD SLINGSHOT INTAKE

Converts any 2 barrel, 3 bolt style manifold to mount 2 carburetors. This sought after design has not been available for decades. The Slingshot mounts the carburetors side by side so that they both get equal air flow. Add a new level of sophistication to your engine. 3.5" high x 9.5" long.
6170 - polished slingshot intake

NEW!

7003

FLATHEAD STAINLESS STEEL MOTOR MOUNTS

Bolt-on stainless steel motor mounts will add some serious style and class to your project. They replace a part that usually looks like a clump of welded steel. Cross drilled and polished.

NEW!

6105

POLISHED BRAKE SCOOP

Beautifully cast aluminum finned brake scoops designed for 1939-48 Ford backing plates. These highly polished pieces of art provide cool air to your brakes and a cool appearance to your car. 4.5" high, 3.5" wide and 2" deep.

NEW!

POLISHED FINNED DASH PANELS

These retro design dash panels follow the engine head designs of early day rodding. Cast to fit 2-1/16", 2-1/8" and 3-3/8" gauges. The deep valleys between the fins are textured to readily grab a contrasting paint color if desired. These old school designs will mount on any flat dash surface.

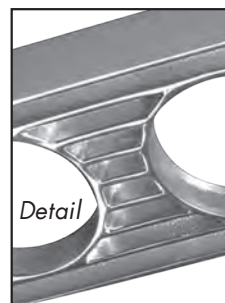

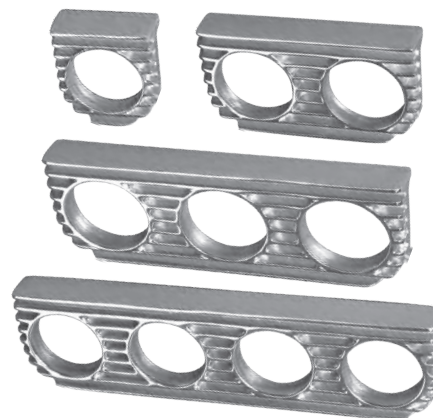

6101 - 5 gauge: 17" long, 5.5" high. 6103 - 6 gauge: 21.5" l, 5.5" h.

OTB GEAR

Detail

NEW!

POLISHED FINNED UNDER-DASH PANELS

These deep fins reflect the famous head designs of the early hot rod era. Cast to fit your 2-1/16" and 2-1/8" gauges. The top surface is undrilled so that you can fit to your needs. Reasonably priced and cool, our under dash gauge panels may be just what you need to give your rod a distinctive look.

6126 - 4 gauge: 12" long, 3-1/4" high.

6124 - 3 gauge: 9" long, 3-1/4" high.

6120 - 2 gauge: 6" long, 3-1/4" high.

6122 - 1 gauge: 3" long, 3-1/4" high.

NEW!

6128

POLISHED FINNED UNDER DASH PANEL MOUNT

Like to add gauges (or other things) under your '29 to '32 dash? This item matches the contour of your dash, giving you a level surface to work with. This unpolished aluminum casting is very lightly scribed with cutoff lines that match the widths of our gauge panels. Simply cut to length, drill to your needs, and polish if desired. Length is 12".

Smithy's

The world's oldest performance muffler is now available for that "resto-rod" or your 1950's custom. Get the muffler your Dad used to impress his friends, and yes, it's still guaranteed not to blow out or leak. Double end cap construction and 3 1/2" hammertone finished cases assure the original Smithy look.

HI-FLO Glasspack

Heavy steel core design has six rows of louvers for reduced restriction and better sound absorption. Long strand sound absorption material is used for increased muffler life.

Also Available:

Hi-Flo Oval Mufflers are great where ground or axle clearance is limited.

Hi-Flo Header mount mufflers accommodate most 3-bolt header flange.

FOOTNOTES

- 6) Due to variations on motor mounts, use recommend Seal Power mounts (#270-2221 left and #270-2220 right) or equivalent. Left mount may need to be ground by 1/4" to provide clearance for collector.
 7) Due to space limitations, use Ford Racing Hi-torque ministarter, part number M-11000-A50 or equivalent
 11) Universal application for most street rod applications

- 15) Can be used with any oil filter system or transmission and starter combination
 16) Tucks very close to engine
 20) All chrome headers are polished before & after assembly for show quality appearance
 55) Fits with "P" type cylinder head

H1620

TORCO ADVANCED LUBRICANTS

With over 56 years of advanced lubricant technology, Torco offers a series of synthetic motor oils specifically designed and formulated for performance street vehicles.

Going beyond base oil technology, SR-1 incorporates Generation 2 MPZ which focuses on reducing frictional losses for:

- Increased horsepower and torque
- Reduced engine temperatures
- Reduced engine deposits
- Improved fuel economy
- Reduced oxidation
- Outstanding wear reduction

The Torco line of Premium Blend Petroleum Oils with MPZ are a blend of hydro petroleum base stocks, special polymers, and proprietary additive systems focused on superior performance and engine protection. TR-1 is an MPZ fortified formula which provides unequalled anti-friction, anti-wear and minimizes frictional losses for increased power.

The new API SL and SM motor oils will not protect High Performance engines because "zinc," the anti-wear chemical, is purposely removed. Torco "ZEP" is the SOLUTION.

ZEP contains Torco MPZ, a perfect balance of molybdenum, phosphorous and zinc, a "new" friction fighting chemistry that adds wear protection back into motor oils.

TORCO RACE FUEL OCTANE BOOSTER

Torco Race Fuel accelerator is not an additive, but a race fuel concentrate! A blend of components will lower the end burn temperature which will make your fuel burn more complete thus releasing all the power your engine has to offer. Mix a 32oz can with 10 gallons of 91 octane boosts and efficient 102 octane race fuel. Mix with 5 gallons and the octane raises to 105. The accelerator is unleaded so it won't harm sensitive O2 sensors or catalytic converters.

NEW!

F500010TE

HYPERKÜHL HIGH PERFORMANCE SUPER COOLANT
Corrosion Inhibitor and Wetting Agent.

Tested and developed for high-speed, high-heat extreme driving on the German Autobahn, HyperKühl contains advanced wetting agents that reduce the surface tension of coolant. This allows more effective heat transfer at critical liquid-to-metal interfaces inside the engine cylinder heads and radiator. The net reduction in heat also allows engine ignition timing to be safely advanced, resulting in more horsepower.

16 oz. Bottle: 08143

EGGE Machine Co. Services

PUMP REMANUFACTURING

FUEL, OIL AND WATER PUMP REMANUFACTURING

Egge Machine Company, a leader in manufacturing pistons and valves, provides high quality pump and timing cover remanufacturing for all automobile applications from 1900 thru Modern.

Egge can meet the quick turn-around demands of busy automotive, truck, and industrial service centers. Each re-manufactured pump is flow tested for pressure and volume to ensure the pump is in proper working order before being shipped out.

Remanufactured

When a pump core is received for remanufacturing, Egge dismantles it and places it in a hot tank to clean the surface and interior passages, removing oil and debris. It is then baked in an oven to remove the residue and then shot-peened to ensure all the ash and residue have been removed. The pump is then inspected for cracks and flaws. Once the pump passes inspection, it is then assembled with the necessary gears and shafts.

Oil Pump Testing

Generally the oil pump will spin at engine speed so that the faster the engine spins the more volume of oil flows through the oil pump and the higher the oil pressure. Therefore, the functioning of the control valve of every oil pump and timing cover are tested at low and high R.P.M. and also the volume and pressure output. This test is conducted using S.A.E. # 10 oil at 200 degrees F.

Guarantee

All pumps meet and/or exceed the original manufacturer's specs and are guaranteed against defective materials or workmanship and guaranteed to work properly every time.

Warranty

THE PROVISIONS OF THIS WARRANTY CONSTITUTE THE ONLY AGREEMENT OR OBLIGATION OF EGGE MACHINE COMPANY. CONCERNING THE SUBJECT OF WARRANTIES, ALL OTHER WARRANTIES, EXPRESS OR IMPLIED INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED. The remedy of replacement provided by this warranty is the only remedy afforded for breach of this written warranty or for breach of any express or implied warranties arising under state law. Egge Machine Company shall not be liable for any labor costs or other expenses in replacing a defective product, nor for any incidental or consequential damages resulting from or contributed to by any defect in materials or workmanship, negligence in manufacture or design, or failure to warn. Egge Machine Company makes no warranty with respect to any product which has been altered or subjected to misuse, abuse or use for which it was not designed.

REMANUFACTURED OIL PUMP WARRANTY

ALL pumps are guaranteed against defective materials or workmanship. Our liability is limited to: the replacement of pump only, and no other incidental or consequential expenses. Any pump returned for warranty must be returned without dismantling to qualify for replacement.

EGGE Machine Co. Services

BABBITTING

BABBITTING RODS AND MAINS

Babbitt work is the method of removing and replacing worn bearing material on main bearings, connecting rod bearings, and (some) cam bearings on antique and vintage engines. The general era of engines that used babbitt bearing material range from the early 1900s to the middle 1930s with the exception being the Chevrolet 216cid and 235cid engines, which used babbitt for the connecting rod bearings as late as 1953.

Babbitted bearings are typically made with an outer shell of either steel or bronze that holds a layer of babbitt material on the inside. The babbitt material acts as the bearing surface which wears over time of operation. However, in some engine applications there are no actual bearing shells. In these applications the "main bearings" are poured directly into the block and main caps. After examination, our babbitt specialist melts out the old babbitt material and pours a new layer of babbitt and machines it to a new SEMI-FINISHED bearing. This semi-finish includes the machined oil grooves and/or oil pockets. The next step is to have our shop perform an ALIGN BORE to size the semi-finished bearings to accept the crankshaft.

Some connecting rods have an insert or shell to hold the babbitt material, other times, when there is no outer shell, the babbitt material is poured directly in the rod itself. With the connecting rods, our babbitt specialist can cut the material to size if supplied with the appropriate crank size.

Egge uses "4X" babbitt material, which is a nickel based aircraft quality babbitt material selected for its top quality and long life. All pricing for babbitt work is done on a case by case review and will depend on the length of time and level of difficulty to perform to work.

Reminder to all of our DIY's and shop mechanics: Please do not discard any worn parts from your project vintage or antique engine, as they may be crucial for proper identification of the correct replacement part or needed for remanufacturing.

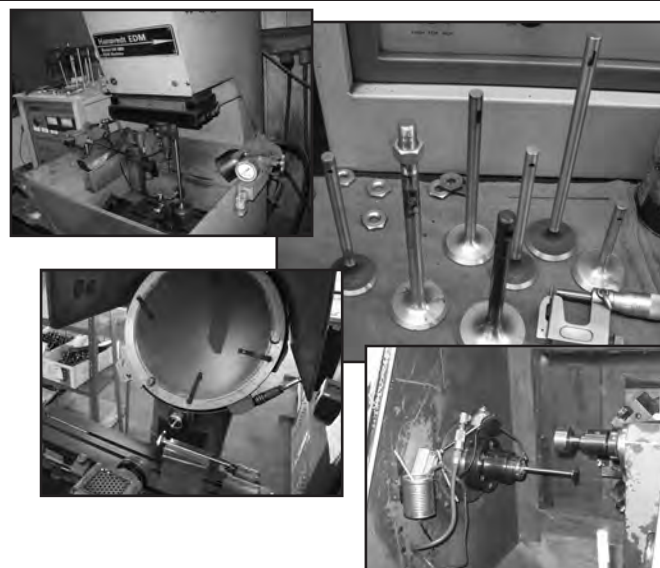

EGGE SERVICES

VALVE MANUFACTURE

Egge Machine Company manufactures valves to tight specifications using stainless steel blanks. If you have a custom or unidentifiable valve to reproduce, simply send us your sample and we will gladly quote on and make a quality valve using old-school craftsmanship and modern processes.

Need to keep those valves moving in the right direction? We also manufacture valve guides to your tight specifications.

For any of our services, please give a call to your Egge Engine Parts Experts and we will get our hands dirty so you can get back to enjoying your classic vehicle.

Look for the Egge Speed Shop on the hit Speed Network series *"My Classic Car with Dennis Gage"*

Egge Machine Company is proud to be the Title Sponsor for the popular garage segment on My Classic Car. The segment features new products, and services from a variety of companies within the classic car industry.

My Classic Car is a weekly television program on SPEED that captures America's love affair with the automobile! Handlebar mustachioed host, Dennis Gage, takes you along for the ride and keeps it entertaining with his unique perspective and enthusiasm for all things automotive. Now in its 14th season, this show has something for everyone. From daily-drivers to Duesenberg's - from local cruise-ins to the most prestigious car shows in the world, this program covers it all.

Look for our exciting new website at EggeSpeedShop.com and the new season of My Classic Car in February of 2010. EggeSpeedShop.com will offer more information about the show and the products and services featured.

Check your local listings and visit the show on the web at www.MyClassicCar.com

EXHAUST VALVE GUIDE.....	G750.....	4
INTAKE VALVE GUIDE.....	G750.....	4
ADJ. VALVE LIFTER.....	VL800.....	1
ADJ. VALVE LIFTER (oversize).....	VL800.015.....	1
CAM GEAR.....	TG2718.....	1
CRANK GEAR.....	TG2719.....	1
CAMSHAFT.....	VMF1-3M.....	1
OIL PUMP KIT.....	PK-300.....	1
GASKET SET.....	RS509C.....	1

Modern Ring Pack Option:

PISTON SET (std bore: 3.875).....	E1104.....	1
RING SET.....	SRH665.....	1

Babbitt bearings service available, call for details!

1928-32 FORD MODEL B KIT.....	F200MB.....	1
PISTON SET (std bore: 3.875).....	E122.....	1
RING SET.....	SRH120.....	1
PIN BUSHINGS.....	PB652.....	4
EXHAUST VALVE.....	SV800SS.....	4
INTAKE VALVE.....	SV800SS.....	4
VALVE SPRING.....	VS301.....	8
EXHAUST VALVE GUIDE.....	G750.....	4
INTAKE VALVE GUIDE.....	G750.....	4
ADJ. VALVE LIFTER.....	VL800.....	1
ADJ. VALVE LIFTER (oversize).....	VL800.015.....	1
CAM GEAR.....	TG2718.....	1
CRANK GEAR.....	TG2719.....	1
CAMSHAFT.....	VMF1-5M.....	1
CAMSHAFT.....	VMF1-B.....	1
OIL PUMP KIT.....	PK-300.....	1
GASKET SET.....	RS573G.....	1

Modern Ring Pack Option: 5/64, 3/32

PISTON SET (std bore: 3.875).....	E1104.....	1
RING SET.....	SRH665.....	1

Babbitt bearings service available, call for details!

EARLY FORD PARTS

- Pistons
- Rings
- Valves
- Lifters
- Sprockets
- And More!

*Notes: Babbitt bearings service available.

NEED INFO: Call for details.

R&R: This part may be Remanufactured or Reground, call your Egge Engine Parts Expert for details. 866-996-3443.

FORD 260 CONTINUES**BABBITT BEARING SERVICE**

Babbitting at it's best.
From our very own
"Babbitt King!"

*Notes: Babbitt bearings service available.
NEED INFO: Call for details.

R&R: This part may be Remanufactured or Reground, call your
Egge Engine Parts Expert for details. 866-996-3443.

PONTIAC 455 CONTINUES

OIL PUMP REBUILDING

Most Makes & Models
Every oil pump we ship
is guaranteed to
work properly.

*Notes: Babbitt bearings service available.
NEED INFO: Call for details.

R&R: This part may be Remanufactured or Reground, call your
Egge Engine Parts Expert for details. 866-996-3443.

PONTIAC 455, RAMBLER/AMC 196

DESCRIPTION	PART NO.	QTY
PONTIAC 455 CONTINUED		
1972 PONTIAC 455 W/2BRL KIT	PO455M72W/2BRL	1
PISTON SET (std bore: 4.151)	L3088	1
RING SET	SRH643	1
